

What is in MoReq2?

■ Overview

- Useful for senior management

■ Requirements

- 794 formal requirements
- Functional & non-functional

3.1.5 The ERMS must allow management by role only, subject to requirements of section 3.4.

In this requirement, “management” refers to the management of the ERMS and section 3.4.

3.1.6 The ERMS should allow management by roles and/or by a specific user.

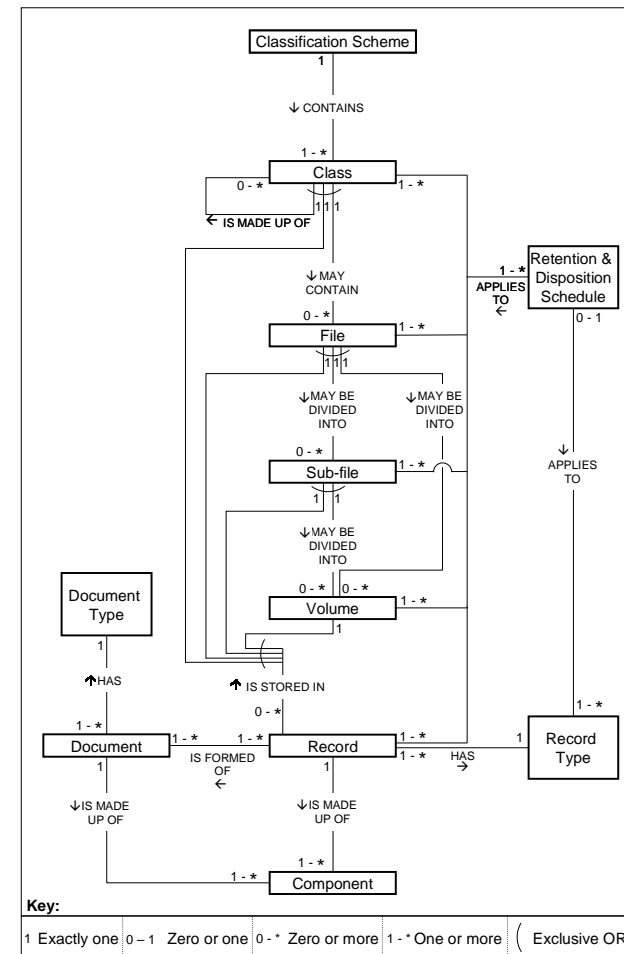

In this requirement, “management” refers to the management of the ERMS and section 3.1.5. This is intended for the management of the ERMS.

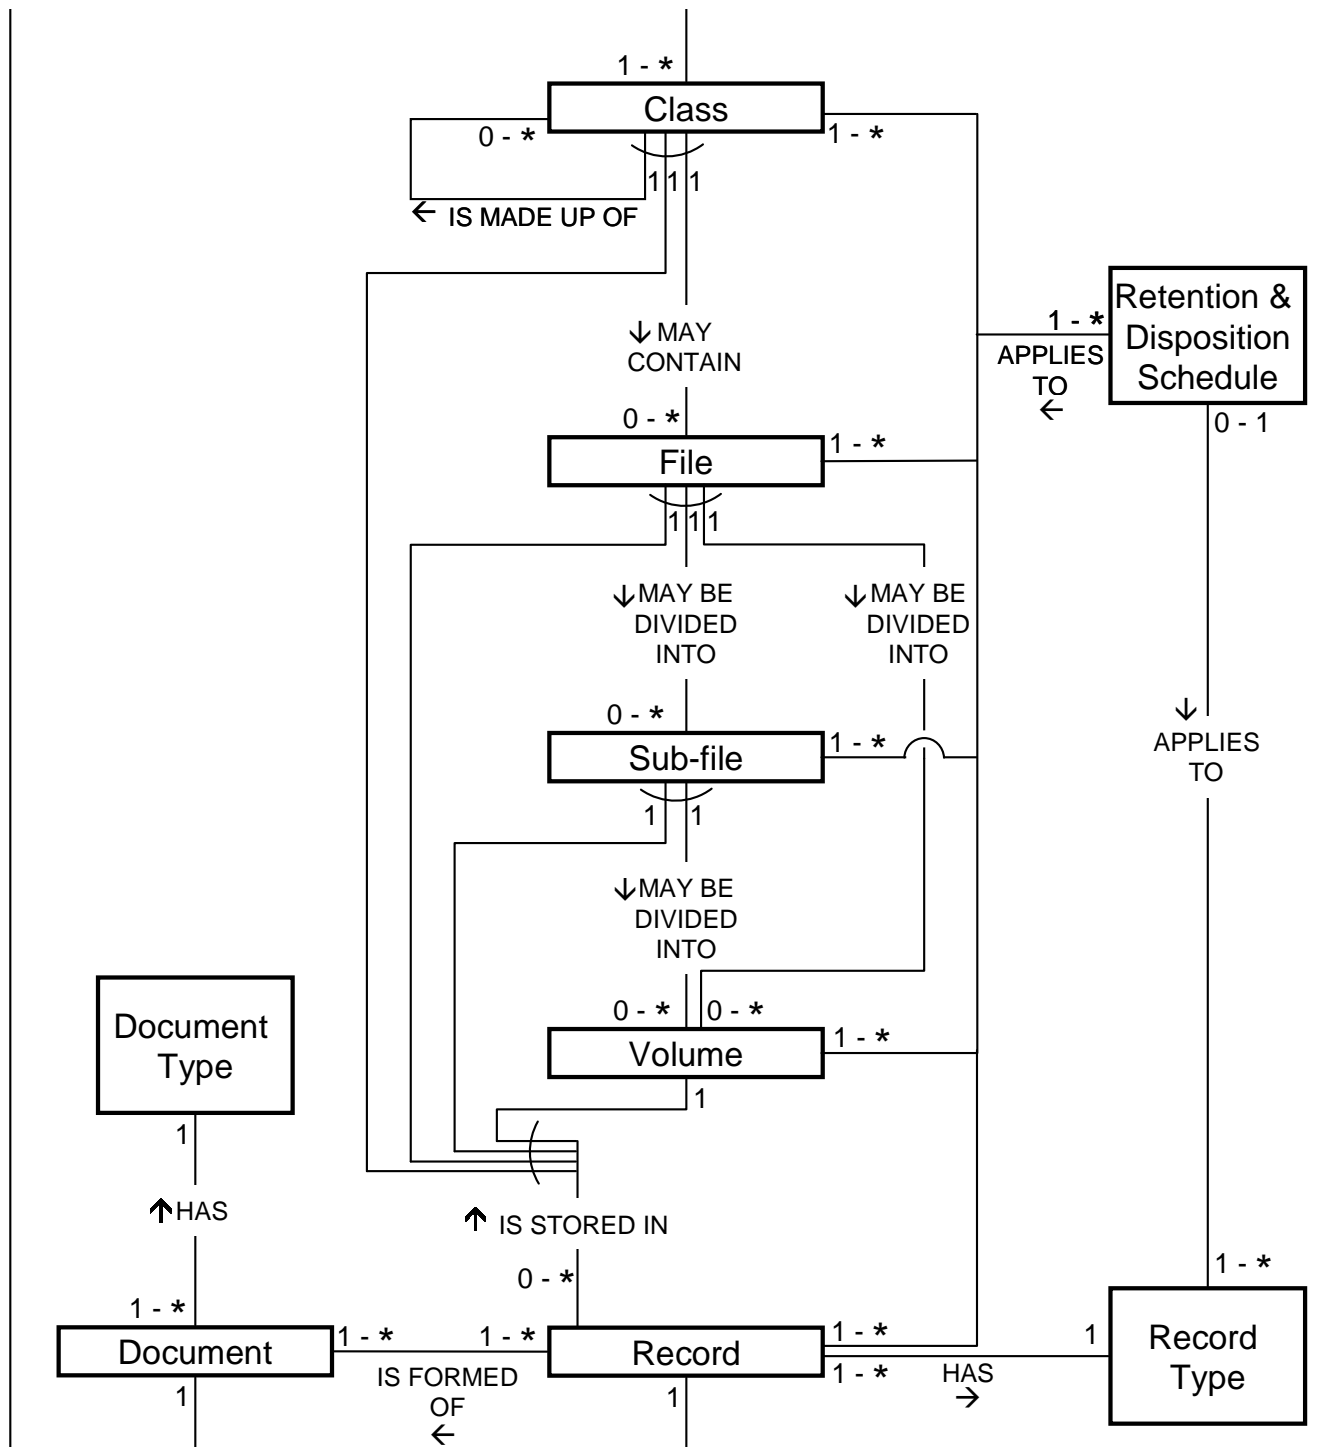

- ♦ *large classification scheme which therefore have a management for the low level of classification*

Example of MoReq2 Metadata definition

M047: Description.abstract.description

	Obligation:	Optional	Occurs:	Once	
Definition:	A textual description of the entity and its relevant content.				
Applies to:	class ✓	file ✓	sub-file ✓	volume ✓	record
Populated:	Manually entered when the entity is created.				
Source	User.				
Default	None.				
Inheritance	None.				
Use conditions:	Can be changed by users who have appropriate access rights.				
Comment:	<p>For classes and files, also known as “scope notes” – narratives intended to clarify the intended contents and/or exclusions of classes and files for the benefit of users. Also known as description.</p> <p>For e-mail value can be taken from RFC 2822 header field “comment” if present (at the time of writing it is rarely used).</p>				
Requirements	3.1.10				

Also...

Countries will add their own “chapter zero”

- Terminology
- National laws
- National regulations and standards
- **DLM Forum plans to ensure that chapters zero do not contradict MoReq2**

- ◆ Poglavlje nič
- ◆ hoofdstuk nul
- ◆ chapitre zéro
- ◆ Kapitel null
- ◆ κεφάλαιο μηδέν
- ◆ capitolo zero
- ◆ capítulo zero
- ◆ глава нул
- ◆ capítulo cero
- ◆ fejezet zéró
- ◆ luku nollata

◆ الفصل الصفر

MoReq2 contains several enhancements

Records management

- Sub-files, case management
- Distributed management
- Mobile working
- New forms of information
- Preservation
- Export, import, transfer
- Disposal hold (legal hold)
- ...

Additional to records management

- Workflows, usability
- Content management integration
- Digital rights management
- Collaborative working
- ...

MoReq2 is modular

- MoReq2 consists of “core module” plus 13 “optional modules”
- Core module contains “pure” records management requirements
- Optional modules contain functionality that is needed by many when managing electronic records, but is not strictly records management
- Compliance with MoReq2 will require compliance with all core module mandatory requirements; compliance with optional modules will be optional

Core module contains

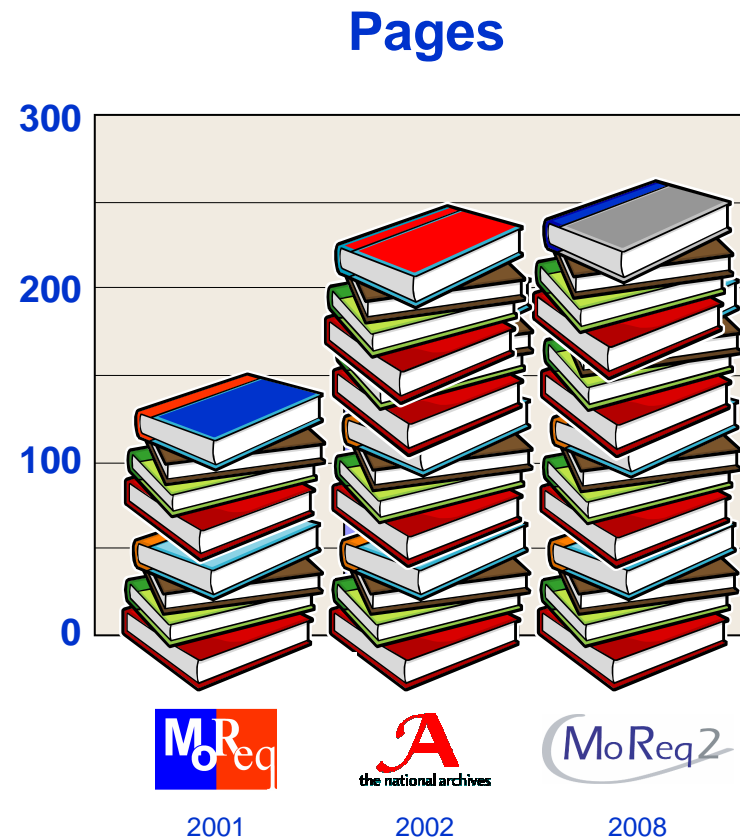

- Classification Scheme and File Organisation
- Retention and Disposition
- Controls and Security
 - Includes management of Vital Records
- Retention and Disposition
- Capturing and Declaring Records
 - Includes e-Mail Management
 - Includes Scanning and Imaging
 - Includes Bulk Importing
- Referencing
- Searching, Retrieval and Presentation
- Administrative Functions
 - General Administration
 - Reporting
 - Changing, Deleting and Redacting Records

Optional modules

- Management of Physical Files and Records
- Disposition of Physical Records
- Document Management and Collaborative Working
- Workflow
- Casework
- Integration with Content Management Systems
- Electronic Signatures
- Encryption
- Digital Rights Management
- Distributed Systems
- Offline and Remote Working
- Fax Integration
- Security Categories

How big is MoReq2?

Excluding metadata model

Test Framework

- Developed by imbus AG (Germany)

- Now available at www.more2.eu
- Testing scheme later this year, run by DLM Forum – Serco not involved
- Will allow buyers of systems to choose MoReq2-compliant software
- Software companies are already working on compliance

T3.1.3.4 The Export of a Classification Scheme and Selected Audit Trail Data

I. Global test case information	
test case id:	T3.1.3.4
test case priority:	<input type="checkbox"/> Mandatory <input checked="" type="checkbox"/> Optional <input type="checkbox"/> Not Testable
test case description:	An administrative role exports a classification scheme with all its audit trail data. Ensure that this export includes all audit trail data. The administrator exports the classification scheme again, just taking selected audit trail data into account.
Req-ID:	3.1.20
II. Test case	
a. precondition(s)	
<ul style="list-style-type: none"> The ERMS supports the export of all or parts of the classification scheme (see test case T3.1.3.1) TestclassificationScheme7 is created. For testing purposes an external target folder .../export is created. logged in as the role CentralAdministrator 	
b. test steps	
step	action/operation
1.	Export classification scheme TestclassificationScheme7 and all its audit trail data to the folder .../export
2.	Analyse the output of the export
3.	Export classification scheme TestclassificationScheme7 and just a part of the audit trail data to the folder .../export
4.	Analyse the output of the export
c. postcondition(s)	
<ul style="list-style-type: none"> The ERMS ensures that an export of a classification scheme includes all audit trail data. The ERMS allows an administrative role to select which audit trail data are included in the export of a classification scheme. 	
III. Test result	
defects / deviations	verdict
	<input type="checkbox"/> passed
	<input type="checkbox"/> failed
